

AUTHENTIC TOMBSTONES

1147 Eitemal Ave, Robertville, Roodepoort

DOUBLE TOMBSTONES

A gravestone or tombstone is a marker, usually stone, that is placed over a grave. A marker set at the head of the grave may be called a headstone. An especially old or elaborate stone slab may be called a funeral stele, stela, or slab. The use of such markers is traditional for Chinese, Jewish, Christian, and Islamic burials, as well as other traditions. In East Asia, the tomb's spirit tablet is the focus for ancestral veneration and may be removable for greater protection between rituals. Ancient grave markers typically incorporated funerary art, especially details in stone relief. With greater literacy, more markers began to include inscriptions of the deceased's name, date of birth, and date of death, often along with a personal message or prayer. The presence of a frame for photographs of the deceased is also increasingly common.

CEMETERIES HAVE THEIR OWN RULES IN TERMS OF THE DIMENSIONS OF THE MEMORIAL, SO NOT EVERY MODEL CAN BE PLACED IN ALL CEMETERIES OR THE DESIGN MUST BE CHANGED.
